Tell us more:

How much water are you planning to treat?

What kind of treatment?

Organic/inorganic

Particular/solved

Which pH-range do you work with?

Which temperature range do you work with?

For particulate substances and/or solids:

Do you have information about the density of the particles/solids?

Do you use hazardous substances?

If so, can you provide us with safety data sheets?

Do you work in special environments?

Explosion protection

Other

Do you have limited space?

If so, how much space do you have for placing the water treatment technology?

Do you need a non-disclosure agreement for further exchange?

What are your goals with the water treatment? What quality of water do you want to achieve?

Should the waste be recycled? Should the water be reusable or available for other processes?

Do you have any other comments or remarks?

Or course your answers will be treated confidentially.

Thank you!
